

15 November 2006

Press release

LNE presenting its services for medical device manufacturers at the MEDICA trade fair

LNE will be taking part in the MEDICA international trade fair in Düsseldorf, Germany, from 15 to 18 November 2006, and looks forward to meeting you at stand 04/H16.

LNE/G-MED operations managers will provide medical device manufacturers with full information on product certification on worldwide markets, including Europe, the United States, Canada, Taiwan, Australia and New Zealand. They will also explain how LNE's new American subsidiary G-MED NA offers major advantages for American manufacturers who wish to place products on their own market or obtain access to other markets where LNE/G-MED is recognized as a competent body.

LNE sales engineers will also be pleased to inform medical establishment representatives and manufacturers about the Laboratory's measurement, testing and technical analysis services, particularly in the fields of orthopaedic implants (hip, spinal column, dental), electromedical equipment (radiology, imaging) and on-site instrument control.

The French National Laboratory of Metrology and Testing (LNE), is a state owned enterprise with some 730 staff. It provides expert services to all companies and bodies involved in product quality and safety. LNE's five core activities are research, calibration and consulting in metrology, testing and analysis, certification, and training.
